SUBHADIP DAS

Senior Software Engineer | Full Stack Developer

Raniganj, West Bengal | +91 8906499398 | subhadipdasrng54@gmail.com | Portfolio: subhadipdas-sigma.vercel.app

PROFESSIONAL SUMMARY

Senior Software Engineer and Full Stack Developer with 3.5+ years of experience designing, building, and leading scalable web applications using **React.js, Next.js, Node.js, and TypeScript**. Currently Team Lead at Langoor, owning system architecture, user flows, and backend design for a serverless **AWS** learning platform (Lambda, API Gateway, SQS, SES, RDS, Cognito, S3) with **Strapi** headless CMS and **Mux** video streaming. Previously delivered internal platforms used by 10,000+ employees at Hindustan Unilever. Strong in system design, REST APIs, cloud architecture, role-based access control, and leading teams to ship clean, maintainable, production-ready software.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Redux, Tailwind CSS, Responsive / Mobile-First UI
Backend: Node.js, Express.js, RESTful APIs, Strapi (Headless CMS), Serverless Architecture, Microservices
Cloud (AWS): AWS Lambda, API Gateway, SQS, SES, RDS, Cognito, S3, EC2
Cloud & DevOps: Microsoft Azure, Docker, Kubernetes, Nginx, Vercel, Git, GitHub
Databases: Amazon RDS, MySQL, MongoDB, Redis, Firebase
Integrations: Mux (Video Streaming), OpenAI APIs, SendGrid, Brevo, Razorpay, Cloudinary, Firebase Auth
Core Strengths: System Design, Solution Architecture, RBAC, Technical Leadership, Code Reviews, Problem Solving

WORK EXPERIENCE

Senior Software Engineer (Team Lead) — Langoor — Jun 2026 – Present

Project: Grown Alchemist Studio — Internal Learning Platform for Grown Alchemist (Personal Care Brand)

- Leading the development team for an internal learning platform where Therapists and Beauty Advisors train through video courses and interactive documentation courses.
- Designed the end-to-end system architecture on a serverless **AWS** stack using **Lambda, API Gateway, SQS, SES, RDS, Cognito, and S3**.
- Defined user flows and backend code design, setting the module structure, API contracts, and coding standards followed by the team.
- Architected **role-based access control (RBAC)** with three admin roles — Super Admin, Market Manager, and Partner Manager — supporting multi-role users and multi-region management.
- Integrated **Strapi** as a headless CMS so content teams can create and manage courses and interactive documentation without developer involvement.
- Integrated **Mux** for video streaming and **Amazon S3** for media and asset storage, delivering smooth course playback for learners.
- Built gamified learning with quizzes and other gamification features to increase learner engagement and course completion.
- Implemented **AWS Cognito** authentication, **SQS** for asynchronous background processing, and **SES** for transactional email notifications.
- Leading task planning and breakdown, code reviews, and technical decisions, guiding developers to deliver features on schedule.

Tech: AWS (Lambda, API Gateway, SQS, SES, RDS, Cognito, S3), Strapi, Mux, Node.js, React.js / Next.js, TypeScript

Full Stack Developer — Qloron Technology (Client: Hindustan Unilever Ltd) — May 2023 – May 2026

- Built an internal Pinterest-style platform from scratch, used by **10,000+ employees** to discover and share automation solutions across teams.
- Developed engagement features (pinning, sharing, commenting, ratings) that increased internal content interaction by **~40%**.
- Designed an admin dashboard with interactive analytics (pie charts, radar graphs) to track user behavior and content performance, reducing manual reporting effort by **~30%**.
- Contributed to a collaborative presentation web app with **real-time multi-user editing** and dynamic graph components, cutting presentation prep time by **~25%**.
- Optimized APIs and data handling across frontend and backend, improving response time by **~20–30%**.
- Improved UI/UX of internal tools, reducing user friction and support requests from non-technical users.

- Collaborated with cross-functional teams to gather requirements and ship features faster, while maintaining clean, scalable code that eased onboarding of new developers.

Tech: Next.js, React.js, Redux, Tailwind CSS, Node.js, MySQL, MongoDB, Microsoft Azure, OpenAI APIs, SendGrid

Full Stack Developer Intern — EBO Solutions **Jan 2023 – May 2023**

- Built the Ebonow website from the ground up for the startup, contributing to both frontend and backend.
- Developed a secure authentication system for user login and registration.
- Implemented a guest cart feature allowing users to save products without logging in.
- Created category filter and product detail pages to improve navigation and user experience.

Tech: React.js, Tailwind CSS, Node.js, MongoDB, Firebase, AWS

PROJECTS

RaniganjJobs — Hyperlocal Job Platform (Personal Project) **raniganjjobs.site**

- Built and launched a hyperlocal job platform connecting job seekers and employers in Raniganj, independently handling frontend, backend, database, and deployment.
- Developed a fast, mobile-first job discovery and application flow, plus employer features to post jobs and manage applications.
- Built scalable REST APIs with optimized database queries and Redis caching; integrated Google login, session management, and data validation.
- Deployed on AWS EC2 behind an Nginx reverse proxy, with SEO, analytics, and Razorpay payments; iterating continuously on real user feedback.

Tech: Next.js (Vercel), Node.js, Express.js, MongoDB, Redis (Upstash), Firebase Auth, AWS EC2, Nginx, Brevo, Cloudinary, Razorpay, Google Analytics

EDUCATION

Bachelor of Computer Applications (BCA) — Chandigarh University **Jul 2026 – Present**
Currently pursuing

Full Stack Web Development Program — Digikull Institute **Sep 2022 – Feb 2023**

Bachelor of Science (Mathematics Honours) — T.D.B College **2017 – 2019**
Discontinued after 2nd year

CERTIFICATIONS

- Full Stack Web Development with React — Udemy (UC-c45b822f-20b5-4c32-894c-0e896cfa7e37)
- Microservices with Node.js and React — Udemy (UC-8635354d-2092-43fa-99f2-1d219ecd0cdb)
